The 2025 U.S. tariff policies introduce profound uncertainty into the global economic landscape. This report critically examines the implications of recent tariff adjustments and international strategic countermeasures on Recycled Drawn Textured Yarn competitive dynamics, regional economic interdependencies, and supply chain reconfigurations. Recycled Drawn Textured Yarn is made from recycled polyester (such as recycled PET bottle chips or waste silk) as raw material, which is melt spun into pre oriented yarn, and then processed into stretch deformed yarn through the process of adding elasticity (false twist deformation).
