Recycled resin, also known as recycled plastic resin, refers to a type of plastic material that is produced by recycling and reprocessing used or discarded plastic products. It involves collecting plastic waste, sorting and cleaning it, and then melting and reforming it into new resin pellets or granules. The recycled resin can then be used as a raw material in various industries to manufacture new plastic products. The process of recycling plastic waste into recycled resin helps reduce the reliance on virgin plastic production, minimize plastic waste in landfills, and contribute to a more sustainable and circular economy.
