Abstracts

Oxalic acid is an organic compound with the formula $C_2H_2O_4$ has greater than 99.5% purity. It is a colorless crystalline solid that forms a colorless solution in water. Its condensed formula is $HOOC-COOH$, reflecting its classification as the simplest dicarboxylic acid. Presently, there are no uniform standard for the refined oxalic acid in the industry. But there are several indicators which can differentiate refined oxalic acid from technical grade oxalic acid, such as purity, the SO_4^{2-} content, the metal ion content and so on. In the report, we define oxalic acid of which purity is 99.4% and the SO_4^{2-} content is 500 ppm as the refined one. (ppm means parts per million). China dominates the global production of oxalic acid due to its cost advantages in raw materials and labor, as well as the presence of large chemical manufacturing capacities. Major global players of refined oxalic acid include Oxaquim, Ube and various Chinese producers like Shandong Fengyuan Chemical and LonG ShinE Industry. These companies typically compete on pricing, production efficiency, and product quality, with a focus on supplying refined oxalic acid for industries such as electronics. The competitive landscape is shaped by fluctuating raw material costs and the rising demand for refined oxalic acid in specialty applications, such as in the electronics industry for surface treatment and cleaning processes. Technological advancements, such as more efficient production methods or eco-friendly processing techniques, also serve as key differentiators among competitors. Opportunities in the refined oxalic acid market arise from the increasing demand for eco-friendly chemicals in industries such as rare earth metals and electronics where oxalic acid plays a significant role in metal extraction, cleaning presents further expansion opportunities. As environmental regulations tighten globally, companies offering refined oxalic acid with lower environmental impact will have a competitive edge.

The global Refined Oxalic Acid market size was estimated at USD 51.2 million in 2025

and is projected to grow at a compound annual growth rate (CAGR) of 3.90% during the forecast period.
