The 2025 U.S. tariff policies introduce profound uncertainty into the global economic landscape. This report critically examines the implications of recent tariff adjustments and international strategic countermeasures on Regenerative Injection for Medical Beauty competitive dynamics, regional economic interdependencies, and supply chain reconfigurations. Regenerative injections for medical aesthetics are injectable treatments that stimulate the body's natural collagen production and tissue regeneration to improve wrinkles, restore volume, and enhance skin firmness. Commonly formulated with biodegradable polymers like poly-L-lactic acid (PLLA) and polycaprolactone (PCL), these agents gradually degrade in the body while promoting long-term collagen synthesis.
