## Abstracts

Residual chlorine is the low level amount of chlorine remaining in the water after a certain period or contact time after its initial application. Through the residual chlorine test, the remaining chlorine amount is determined in water that has finished testing and is ready to be released in the distribution system. Residual Chlorine Analyzer is designed to monitor free chlorine (residual chlorine) in drinking water, industrial cooling and rinse water, wastewater, etc. Chlorine meters are in high demand due to strict legislation governing water safety and the need to maintain the established safety level. Chlorine meters are used in the water treatment plant to track the concentration of chlorine.
