Abstracts

The 2025 U.S. tariff policies introduce profound uncertainty into the global economic landscape. This report critically examines the implications of recent tariff adjustments and international strategic countermeasures on Residual Current Detectors competitive dynamics, regional economic interdependencies, and supply chain reconfigurations.Residual Current Detectors (also known as GFCI or RCCB) are the core protection devices in the power distribution system. Their core function is to automatically cut off the power supply when a leakage fault occurs in the line, thereby effectively preventing personal electric shock accidents and equipment damage. According to the current national standards, this type of product is mainly divided into two technical categories: one is a residual current circuit breaker with overcurrent protection that complies with the GB/T 16917.1 standard, which integrates the triple protection functions of leakage, overload and short circuit; the other is a product without overcurrent protection that complies with the GB/T 16916.1 standard, which only has basic leakage protection functions. These two technical routes meet the electrical safety protection needs in different application scenarios and jointly build a complete leakage protection system.Residual current protector, commonly known as leakage switch. There are certain differences in the types of leakage protectors in different application scenarios, which are specifically reflected in the models of leakage protectors. For example, Schneider Electric's leakage protectors include AC type, A type, F type, B type, etc. Among them, AC type is mainly suitable for residential (water heaters, ovens, vacuum cleaners and other home appliances), while A type is suitable for (computers, induction cookers, dishwashers, microwave ovens, etc.). The core function is mainly leakage/electric shock protection. There are many brands in the global market, and many brands are also OEM models. The core companies of residual current protectors (RCDs) mainly include Schneider, Siemens, Hitachi Energy (ABB), Eaton, Panasonic, etc.; Chinese local companies include Chint Group, DELIXI ELECTRIC, Bull Group,
