Abstracts

The 2025 U.S. tariff policies introduce profound uncertainty into the global economic landscape. This report critically examines the implications of recent tariff adjustments and international strategic countermeasures on Resin Veneer competitive dynamics, regional economic interdependencies, and supply chain reconfigurations. Resin veneers are a material and technology commonly used in cosmetic dental restorations, mainly used to improve the color, shape, size and slight misalignment of teeth. It covers the surface of teeth with composite resin materials, and through sculpting, polishing and light curing, makes the teeth look more natural, neat and beautiful. Compared with porcelain veneers, resin veneers have the advantages of short production cycle, relatively low cost, simple repair process and strong reversibility. They are suitable for patients with limited budgets or who need to quickly improve the beauty of their teeth. Resin veneers are subdivided into direct resin veneers and indirect resin veneers. The price range is US\$100/piece---US\$1,200/piece, and the core applications are hospitals and dental clinics. As of May 2025, the main development trend of the industry is driven by thinness, personalized medical care and aesthetic needs. The global market size in 2024 is US\$319.06 million. The CAGR in the past five years is 9.2%. Production companies are mainly distributed in Europe, North America, and Asia. The main consumption areas are North America, Europe, Asia, and other parts of the world. The upstream raw materials of resin veneers are mainly resins. The main production equipment is vacuum mixers, 3D printers, and UV curing boxes. Judging from the development in the past three years, with the advancement of medicine and medical materials, the development has been relatively rapid. The import ratio is about 23%, and there is a great opportunity for domestic substitution.

The global Resin Veneer market size was estimated at USD 319.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 9.20% during the

forecast period.
