## Abstracts

Retail ERP systems are comprehensive management platforms for retail enterprises such as supermarkets, department stores, chain stores, and e-commerce. They focus on key business areas such as merchandise, inventory, procurement, sales, membership, pricing, finance, and settlement, enabling unified data and collaborative processes across stores and channels to improve operational efficiency and decision-making. Global Market Future Development Trends First, cloudification and subscription are becoming mainstream. With retail enterprises having widely distributed stores and limited IT teams, SaaS/cloud ERP, with its advantages of on-demand subscription, rapid deployment, and mobile access, is gradually replacing traditional on-premises deployment models. Hybrid cloud architecture is also being adopted by leading chains to balance data security and flexible scalability. Second, omnichannel operations and data-driven approaches are core directions. Retail ERP will more deeply integrate POS systems, online stores, mini-programs, food delivery platforms, and third-party e-commerce, enabling real-time synchronization of products, prices, inventory, and membership benefits across multiple channels. Simultaneously, through data warehousing and BI analysis, it will provide decision support for gross profit structure, replenishment strategies, user segmentation, and precision marketing. Third, intelligentization and ecosystem development continue to evolve. Leveraging AI, RPA, and algorithmic models, systems will play a greater role in scenarios such as intelligent replenishment, dynamic pricing, loss prevention and early warning, scheduling, and supply chain collaboration. Vendors, through open APIs, will form an ecosystem with interfaces for payment, logistics, marketing automation, CRM, taxation, and government regulation, providing retail enterprises with end-to-end digital solutions.

The global Retail ERP System market size was estimated at USD 2610.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 6.00%
