### Report Overview

Traditionally, the term “retail media” refers to in-store advertising placements within brick & mortar retail locations. Today, a retail media advertising network is a collection of channels that a digital retail entity has on its website, app, or other platforms within its organization. A network might span a single site or several digital properties and typically includes ad inventory on key locations along the buyer’s journey, such as the home, category, search, and product detail pages. Because their ecosystems include both shopping and purchasing activities, they’re an excellent source of rich data about customer buying patterns.

Retail media networks can include channels such as ecommerce sites, OTT platforms like Roku, connected TV and more, making them beneficial for any size business in any industry.

Bosson Research’s latest report provides a deep insight into the global Retail Media Platform market covering all its essential aspects. This ranges from a macro overview of the market to micro details of the market size, competitive landscape, development trend, niche market, key market drivers and challenges, SWOT analysis, Porter’s five forces analysis, value chain analysis, etc.

The analysis helps the reader to shape the competition within the industries and strategies for the competitive environment to enhance the potential profit. Furthermore, it provides a simple framework for evaluating and accessing the position of the business organization.
