## Abstracts

Reusable laser fiber is a reusable surgical fiber optic laser delivery device with rare-earth elements in order to deliver laser light to tissue. Thulium laser fiber contributed the largest market share in the disposable laser fiber market in 2022, owing to better endoscopic view, less stone pushback, and slightly better stone-free rate. Based on application, dermatology contributed the largest market share in the disposable laser fiber market in 2022. This is due to the rising number of cosmetic surgeries coupled with increasing use of medical lasers for these treatments and driving the growth of this segment. By region, North America will contribute the largest share to market growth in 2022. Technological advances in medical devices and the rapid rise of eye surgeries such as cataracts. Major cosmetic surgeries such as breast augmentation, liposuction, eyelid surgery, nose jobs, tummy tucks, and facial tucks. Hence, the above-mentioned factors have led to the growing demand for disposable laser fibers in the region.
