### Report Overview

A reusable menstrual disc is a type of menstrual product that is inserted into the vagina to collect menstrual blood. Unlike traditional menstrual cups, which are bell-shaped and sit low in the vaginal canal, menstrual discs are round, flat, and are designed to sit higher in the vaginal fornix, near the cervix.

Menstrual discs are usually made of medical-grade silicone, but some brands also offer disposable options made of a soft plastic material. They are designed to be reusable, and most can be used for up to 12 hours before needing to be emptied and washed.

One advantage of menstrual discs over traditional menstrual products like pads and tampons is that they are more eco-friendly, as they are designed to be reused for several menstrual cycles. Additionally, many users find that menstrual discs are more comfortable than other menstrual products, as they are typically more flexible and conform to the body.
