The 2025 U.S. tariff policies introduce profound uncertainty into the global economic landscape. This report critically examines the implications of recent tariff adjustments and international strategic countermeasures on RFID UHF Etching Antenna competitive dynamics, regional economic interdependencies, and supply chain reconfigurations. In 2024, global production of RFID UHF etching antennas reached 2.205 billion, with an average selling price of US\$0.50 per antenna. RFID tag antennas can be broadly categorized into the following categories, depending on their conductor material, material structure, and manufacturing process: etched antennas, printed antennas, wound antennas, additive antennas, ceramic antennas, and fragile etched anti-transfer antennas. Etched antennas, typically made of copper or aluminum, are the mainstream manufacturing process for RFID antennas, boasting the highest market share and the most mature technology. RFID tag antennas can be broadly categorized into the following categories based on their conductor material, structure, and manufacturing process: etched antennas, printed antennas, wound wire antennas, additive antennas, ceramic antennas, and fragile etched anti-transfer antennas. Etched antennas are typically made of copper or aluminum and are the mainstream manufacturing process for RFID antennas, boasting the highest market share and the most mature technology. The RFID UHF etched antenna operates between 860MHz and 960MHz, offering a long read range of up to 10 meters. Definitions of this frequency vary globally: Europe and parts of Asia define it as 865-868MHz, North America as 902-928MHz, and China uses 920-925MHz. This frequency range is widely used in footwear and apparel retail, logistics management, warehouse management, and production line automation. The downstream industry chain for etched RFID antennas encompasses various end-user applications. These applications primarily focus on ultra-high frequency (UHF) RFID technology, with terminals primarily used in footwear and apparel, supermarket retail, library and archives, and logistics, primarily in footwear and apparel and commerce.

These include brands like Walmart, ZARA, Uniqlo, Decathlon, and Nike. Applications in the logistics industry include Cainiao Logistics and China Postal Express & Logistics.

The global RFID UHF Etching Antenna market size was estimated at USD 1103.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 7.50% during the forecast period.
