Abstracts

Rhizoma Gastrodiae Tablets are a traditional Chinese medicine (TCM) product derived from the dried tuber of *Gastrodia elata*, a perennial herb known in Chinese as "tian ma." These tablets are primarily marketed as a neuroprotective and calming agent, commonly used to address symptoms associated with headaches, dizziness, hypertension, and neurological conditions such as trigeminal neuralgia and facial paralysis. The product leverages the herb's historical use in TCM, where it is believed to pacify the liver, extinguish wind, and relieve convulsions, with modern pharmacological studies identifying active compounds like gastrodin and vanillyl alcohol that contribute to its purported anti-inflammatory, antioxidant, and cerebrovascular effects. Available both as prescription and over-the-counter formulations depending on regional regulations, Rhizoma Gastrodiae Tablets cater to consumers seeking natural or complementary therapies, often positioned as an alternative or adjunct to conventional Western treatments for neurological and cardiovascular ailments.
