This report critically examines the implications of recent tariff adjustments and international strategic countermeasures on Ridge Vents competitive dynamics, regional economic interdependencies, and supply chain reconfigurations. In 2024, global ridge vent production reached approximately 20 m units, with an average global market price of around US\$ 145 per unit. Ridge vent is strip ventilation devices installed on the highest ridge of the roof. They use the principle of natural rise of hot air (thermal convection) to work in conjunction with the air inlets under the eaves to form continuous air flow, thus effectively discharging the hot air and moisture in the attic and helping to regulate the temperature and humidity inside the roof.

**Market Concentration and Key Players:** Internationally, the market concentration of ridge vent is relatively high, mainly concentrated in developed countries such as Europe and America." For example, large manufacturers such as Air Vent and Quarrix; from the domestic perspective, there is still a lot of room for development of ridge vent.

**Manufacturing Processes and Market Trends:** The fabrication process for ridge vent involves stamping, forming, welding and surface treatment of metal coils (e.g., galvanized steel, aluminum) or plastics to ensure weather and corrosion resistance. Market trends show that, with the increasing demand for energy-efficient buildings and the improvement of ridge vent standards, ridge vent are moving towards efficient ventilation, rain and insect protection, aesthetic design integrated with roof materials and longer service life. In addition, material innovation and intelligent production are also improving product performance and production efficiency, while market competition drives enterprises to pay attention to product durability and installation convenience to meet the needs of diversified roof structures.

The global Ridge Vents market size was estimated at USD 2873.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 3.50% during the
