Report Overview

A riding mower is a type of lawn mower on which the operator is seated, unlike mowers which are pushed or towed.

Riding mowers, which sometimes resemble small tractors, are larger than push mowers and are suitable for large lawns, although commercial riding lawn mowers (such as zero-turn mowers) can be 'stand-on' types, and often bear little resemblance to residential lawn tractors, being designed to mow large areas at high speed in the shortest time possible. The largest multi-gang (multi-blade) mowers are mounted on tractors and are designed for large expanses of grass such as golf courses and municipal parks, although they are ill suited for complex terrain requiring maneuverability.
