Report Overview

Ring spun yarn is made by twisting and thinning the cotton strands to make a very fine, strong, soft rope of cotton fibers. Most yarns made from staple fibers are ring spun yarns. The twist that provides the final entanglement is built up from the outside to the inside. Although a high quality ring yarn first appears to be as uniform as a filament, closer microscopic examination would reveal a uniform helical arrangement of fibers at the surface. Ring-spun yarn are more durable and last longer than their regular counterparts, but will also be more expensive, too.
