Abstracts

The 2025 U.S. tariff policies introduce profound uncertainty into the global economic landscape. This report critically examines the implications of recent tariff adjustments and international strategic countermeasures on Riser Pole Arrester competitive dynamics, regional economic interdependencies, and supply chain reconfigurations.A Riser Pole Arrester is a special type of surge arrester mounted at the riser pole — where overhead power lines connect to underground cables. Its job is to protect both the overhead line, and the underground cable from lightning strikes and switching surges. Because the transition between overhead and underground wiring is vulnerable (especially to lightning), riser pole arresters are installed right at that point to catch and divert surges to ground before they can enter the underground system and cause major damage.

The global Riser Pole Arrester market size was estimated at USD 137.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 3.10% during the forecast period.

This report offers a comprehensive and in-depth analysis of the global Riser Pole Arrester market, covering all critical facets from a broad macroeconomic overview to detailed micro-level insights. It examines market size, competitive landscape, emerging development trends, niche segments, key drivers and challenges, as well as conducts SWOT and value chain analyses.
