Report Overview

Laser welding is a welding technique used to join pieces of metal or thermoplastics through the use of a laser. The beam provides a concentrated heat source, allowing for narrow, deep welds and high welding rates. Laser cutting is a technology that uses a laser to slice materials. Laser cutting works by directing the output of a high-power laser most commonly through optics. Laser welding and cutting is inherently more precise than traditional welding and cutting. Welding/cutting robot is especially important for laser applications such as laser cutting, welding
