Abstracts

The 2025 U.S. tariff policies introduce profound uncertainty into the global economic landscape. This report critically examines the implications of recent tariff adjustments and international strategic countermeasures on Robotic Sandblasting Systems competitive dynamics, regional economic interdependencies, and supply chain reconfigurations. Robotic Sandblasting Systems are automated machines designed to perform surface preparation by propelling abrasive materials (like sand, steel grit, or aluminum oxide) at high speed onto a workpiece using a robotic arm. Unlike manual sandblasting, these systems provide high precision, repeatability, and efficiency, while improving safety and environmental control by containing dust and debris. In 2024, global Robotic Sandblasting Systems production reached approximately 21 k units, with an average global market price of around US\$ 9000 per unit. The production capacity for Robotic Sandblasting Systems in 2024 was approximately 25 k units. The typical gross profit margin for Robotic Sandblasting Systems is between 20% and 40%. The robotic sandblasting systems value chain consists of upstream suppliers of industrial robots, blasting machines and nozzles, control systems and servo drives, sensors and vision modules, as well as blasting media such as steel shot, glass beads, and alumina. The midstream is composed of system integrators and automation equipment manufacturers who combine robots, blasting equipment, and control systems into fully functional sandblasting solutions for industries such as automotive, aerospace, shipbuilding, and machinery manufacturing. Downstream customers include automotive component manufacturers, aircraft engine maintenance firms, steel structure producers, and precision machining companies, all of which demand surface treatment, deburring, rust removal, and surface preparation services.

The global Robotic Sandblasting Systems market size was estimated at USD 191.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of

5.80% during the forecast period.
