Abstracts

A robotic scrubber and dryer is an automated device designed to clean and dry floors or other surfaces. It combines the functions of scrubbing to remove dirt, grime, and stains with the ability to dry the surface quickly afterward. Equipped with rotating brushes or pads for effective scrubbing and squeegees or similar drying components, it navigates autonomously around the area to be cleaned using advanced sensor technology. This allows it to detect obstacles, map out the cleaning space, and follow an efficient path.
