## Abstracts

Rodless electromechanical actuators support and transport loads to their desired locations. Unlike ram-style linear actuators which typically push and pull load, rodless actuators are best suited for transporting loads, particularly at long stroke lengths. According to our 'Construction Machinery' research center, sales of construction machinery in Europe increased by 24% in 2021, and in 2022 the construction machinery revenue in Europe was about US\$ 22 billion, while the US market sold about \$36 billion in construction machinery in 2022. China's construction machinery has complete categories and outstanding advantages, with 20 categories, 109 groups, 450 models, 1090 series and tens of thousands of models of product equipment. By the end of 2021, the number of major products of construction machinery in China was about 5.61 million to 6.08 million units. According to our 'Construction Machinery' research center, the total sales of the top 50 global construction machinery manufacturers in 2022 reached US\$ 220 billion. And Asian companies occupied an absolute advantage, accounting for 50% of revenue, followed by Europe and North America, accounting for 26% and 23%.

The global Rodless Electro-mechanical Actuators market size was estimated at USD 370.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 4.60% during the forecast period.
