Report Overview

Roll containers, also known as roll cages or trolleys, are wheeled transport units designed for efficient movement of goods in warehouses, retail stores, and logistics operations. Constructed from durable materials like steel or heavy-duty plastic, they feature a sturdy frame with multiple shelves or compartments to maximize storage space while ensuring easy maneuverability. Commonly used in retail backrooms, distribution centers, and manufacturing facilities, roll containers enhance workflow efficiency by enabling bulk transportation of items such as stock, parcels, or raw materials.
