Report Overview

Roll laminator can laminate a high volume of documents and will keep their size and shape. Versatile and speedy, roll laminators handle everything from individual tags to large banners with continuously moving, smooth roller action. With roll laminators, two rolls of laminating film are loaded into the machine—one on top, one on the bottom. The laminator feeds your documents between the two rolls. Then, it uses heat and/or pressure to form a lasting seal.
