The 2025 U.S. tariff policies introduce profound uncertainty into the global economic landscape. This report critically examines the implications of recent tariff adjustments and international strategic countermeasures on Rolled Ridge Vent competitive dynamics, regional economic interdependencies, and supply chain reconfigurations. Rolled Ridge Vent is a type of continuous attic ventilation product made from flexible material that is installed along the peak of a sloped roof to allow warm, humid air to escape from the attic space. It comes in a roll form, making it easy to handle and install, and is typically covered with ridge cap shingles to blend seamlessly with the roofline.
