Abstracts

Rollups as a Service (RaaS), a relatively new concept in the world of blockchain technology has come into existence with the growing popularity of layer 2 systems. It has completely changed the way we interact with the blockchain. Simply put, RaaS allows developers and businesses to easily integrate layer 2 scaling solutions in their dApps. As discussed earlier, these rollups enhances speed and efficiency of blockchain network by bundling individual transactions into a single batch and reducing the overall number of transactions on the main blockchain. This not only increases the speed of transactions but also significantly reduces the cost of gas fees. Rollups as a Service (RaaS) is a pre-built and managed solution that makes it easier for developers to deploy and run their custom Rollup chains for their dApps. It acts as an abstraction layer, which simplifies the complex process of building and maintaining Rollups from scratch.
