Abstracts

The 2025 U.S. tariff policies introduce profound uncertainty into the global economic landscape. This report critically examines the implications of recent tariff adjustments and international strategic countermeasures on Rotary Pre-made Bag Packaging Machine competitive dynamics, regional economic interdependencies, and supply chain reconfigurations. In 2024, global sales of Rotary Pre-made Bag Packaging Machines reached 12,800 units, with an average selling price of US\$26,000. Rotary Pre-made Bag Packaging Machines are medium-to-high-speed packaging equipment that uses a multi-station rotary structure to automatically load, open, fill, seal, and inspect bags. They are suitable for the food, pet food, condiment, chemical small packaging, and daily chemical industries. Upstream suppliers mainly include core component suppliers such as stainless steel sheets, servo motors, PLC control systems, vacuum pumps, and pneumatic components. Downstream enterprises are mainly snack food factories, grain and oil processing plants, personal care product companies, and OEM manufacturers, who use flexible packaging lines to increase capacity and reduce costs. Currently, the industry's total capacity is approximately 21,000 units per year, with an average gross profit margin ranging from 18% to 28%, with higher-end models having higher gross profit margins. Downstream consumption is highest in the food and pet food industries, accounting for approximately 58% combined, followed by chemicals and daily chemicals at approximately 27%, with the remainder being for specialty material packaging. In terms of upstream material consumption, stainless steel structural components account for approximately 35% of the total machine cost, electrical control systems and servo systems account for approximately 30%, and pneumatic and transmission components account for approximately 20%. On the demand side, with the increasing global trend towards smaller food packaging, rising demand for flexible packaging from cross-border e-commerce, and accelerated automation upgrades for SMEs, the demand for rotary pre-packaged bag machines maintains steady growth. Business opportunities are

mainly concentrated in high-speed multi-station models, dual-purpose models for powder and liquid processing, digital production lines integrated with vision inspection, and cost-effective models targeting emerging markets such as Southeast Asia and Africa.

The global Rotary Pre-made Bag Packaging Machine market size was estimated at USD 333.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 7.80% during the forecast period.
