Abstracts

The 2025 U.S. tariff policies introduce profound uncertainty into the global economic landscape. This report critically examines the implications of recent tariff adjustments and international strategic countermeasures on Rotary Self-ligating Bracket competitive dynamics, regional economic interdependencies, and supply chain reconfigurations. Rotary self-ligating brackets are an advanced type of self-ligating orthodontic brackets featuring a rotary or rotating-sliding locking mechanism. This design allows the built-in clip or cover to open and close through a rotational motion, enabling the archwire to be secured without the need for traditional ligatures.
