Report Overview

The Rummy card game is a popular skill-based card game that involves forming valid sequences or sets from the dealt cards, typically played with two to six players using one or two standard decks, often including jokers. The game's objective is to arrange cards into predefined combinations, with variations like Points Rummy, Pool Rummy, and Deals Rummy catering to different player preferences. Rummy blends strategy, probability assessment, and quick decision-making, making it widely appealing as both a social pastime and a competitive online gaming format. Its digital adaptation has gained significant traction due to features like multiplayer modes, secure transactions, and real-time gameplay, positioning it within the broader online gaming and gambling markets, particularly in regions like India where it enjoys legal recognition as a game of skill rather than chance.
