Abstracts

S-2 glass fiber is a high-strength, high-performance glass fiber that is made through a specific production process and has excellent physical and chemical properties. The tensile strength of S-2 glass fiber is generally much higher than that of ordinary E-glass fiber, about twice as high, and the stiffness is also about 10-20% higher. S-2 glass fiber has better adhesion in the resin matrix, which helps to improve the overall performance of the composite material. S-2 glass fiber has excellent temperature resistance and can remain stable in high temperature environments. The material also has good corrosion resistance and can resist erosion by a variety of chemicals. At present, the major players of S-2 Fiberglass in the world include: AGY, Taishan Fiberglass, CPIC, Huatek New Material, etc. among them AGY is the world's largest S-2 Fiberglass manufacturer, its revenue market share is about 46%. In consumption market, Asia-Pacific is the mainly consumption regions due to the bigger demand of downstream applications. Asia-Pacific occupied 43% of the global consumption revenue in total. S-2 Fiberglass are mainly used in Aerospace and Defense, Wind Energy, Electrical and Electronics, Sporting Goods, etc. markets. In S-2 Fiberglass market, Aerospace and Defense holds an important share in terms of Application. Market driving factors Transformation and upgrading of manufacturing industry: As the global manufacturing industry transforms towards intelligence and greenness, the demand for high-performance fiber materials continues to increase. S-2 Fiberglass has become the preferred material in many manufacturing fields due to its excellent properties such as light weight, high strength, corrosion resistance and high temperature resistance. Technological progress: Technological progress and innovation have promoted the improvement of S-2 Fiberglass performance and the expansion of its application areas. For example, by improving production processes and formulas, the strength and corrosion resistance of S-2 Fiberglass can be improved; at the same time, new application areas such as aerospace and electronics industries are also being developed. Policy

support: Governments of various countries have introduced relevant policies to support the development of new materials industries, providing strong policy guarantees for the prosperity of the S-2 Fiberglass market.

The global S-2 Fiberglass market size was estimated at USD 582.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 8.40% during the forecast period.
