Report Overview

A catamaran is a multi-hulled watercraft featuring two parallel hulls of equal size. It is a geometry-stabilized craft, deriving its stability from its wide beam, rather than from a ballasted keel as with a monohull sailboat. Being ballast-free and therefore lighter than a monohull, catamarans often have a shallower draft (draught) than comparably-sized monohulls. The two hulls combined also often have a smaller hydrodynamic resistance than comparable monohulls, requiring less propulsive power from either sails or motors.

The global Sailing Catamarans market size was estimated at USD 878.50 million in 2023 and is projected to reach USD 1509.60 million by 2032, exhibiting a CAGR of 6.20% during the forecast period.

North America Sailing Catamarans market size was estimated at USD 253.89 million in 2023, at a CAGR of 5.31% during the forecast period of 2024 through 2032.
