The 2025 U.S. tariff policies introduce profound uncertainty into the global economic landscape. This report critically examines the implications of recent tariff adjustments and international strategic countermeasures on Salmon PDRN API competitive dynamics, regional economic interdependencies, and supply chain reconfigurations. PDRN is deoxyribonucleic acid (DNA) product, mainly comes from semen and roe of fish, rapidly repair injured scars. It can promote the collagen synthesis on the cell surface, reverse aging signs. PDRN is the excellent skin repair product widely used for both high-end beauty products and medical products. Strong functions of anti-radiation and shrinking pores, make skin appears brightly and elastically. Polydeoxyribonucleotide (PDRN) and polynucleotide (PN) are regenerative materials extracted from the regenerative cell (sperm and testicle) gene segment (DNA) of salmon or trout. The molecular sizes of PDRN and PN are different (PN is bigger) and they are safe biogenic substances approved by the Ministry of Food and Drug Safety. PDRN are often used in pharmaceuticals for tissue regeneration and cornea regeneration as well as treatment and tissue restoration of wounds. PN is often used for medical devices (tissue regeneration) for skin regeneration, articular cartilage regeneration, and osteogenic tissues. Both PDRN and PN are included in the report. As a product of regenerative medicine, PDRN can synthesize DNA from damaged or hypoxic tissues, activate the regeneration of endogenous growth factors such as FGF, IGF, and EGF, accelerate cell metabolism, and improve skin repair and regeneration capabilities. The fiber network full of collagen and elastin can achieve skin rejuvenation, improve skin microenvironment, increase skin thickness, etc., so as to achieve the effect of improving problem skin. The PDRN market has shown a significant growth trend in recent years, mainly driven by the field of regenerative medicine and tissue engineering, as well as the field of aesthetics. Demand for innovative solutions in medical fields such as wound healing, dermatology, orthopedics is driving the demand

for PDRN products and therapies. In terms of product types, freeze-dried powder occupies an important position, dominated with 65% market share in 2024, preferred for stability and versatility in pharmaceuticals and cosmetics. While PDRN Solutions are growing demand in injectables (e.g., mesotherapy), especially in Korea's "salmon needle" treatments. Expected to surge due to ease of clinical application. At the same time, in terms of application, the share of Medical Aesthetics (Mesotherapy) in 2024 is about 32%, used in "regenerative hydrogels" for collagen synthesis and anti-inflammatory effects. The major global manufacturers of Salmon PDRN API include HTL Biotechnology, Ruijiming Biological, PharmaResearch Co., Ltd., Humedix, ReaLi Tide Biological, HENGYU BIOPH, Mastelli, Dongkook, BR PHARM, BMI KOREA, BNF Solution, etc. In 2024, the world's top three vendors accounted for approximately 56% of the revenue. As a new type of regenerative material, PDRN has multiple activities such as promoting skin damage repair, anti-inflammatory, promoting angiogenesis, improving tissue microcirculation, etc. It has broad application prospects in the fields of medical devices, medicine, cosmetics, health foods, daily chemical products, medical cosmetology, etc. In the future, with the rise of medical beauty consumption and the expansion of application fields, the scale of the PDRN market will further expand. The PDRN market is poised for explosive growth, anchored by Asia-Pacific's dominance (Korea/China) and diversification into cosmetics/wound care. Key developments include China's regulatory openings, plant-based innovations, and the rise of "regenerative aesthetics."

The global Salmon PDRN API market size was estimated at USD 72.1 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 32.50% during the forecast period.
