Report Overview

Samarium Acetate Solutions are moderate to highly concentrated liquid solutions of Samarium Acetate. They are an excellent source of Samarium Acetate for applications requiring solubilized materials. Acetates are excellent precursors for production of ultra high purity compounds and certain catalyst and nanoscale (nanoparticles and nanopowders) materials. Acetates are also proving useful in the field of solar energy technologies: in January 2013, researchers at the Harbin Institute of Technology's Shenzhen Graduate School found that inserting ultrathin film layers of lithium acetate vastly improved the performance Bulk Quantity Acetate Solution Packaging of polymer bulk-heterojunction solar cells. American Elements can prepare dissolved homogeneous solutions at customer specified concentrations or to the maximum stoichiometric concentration. Packaging is available in 55 gallon drums, smaller units and larger liquid totes. American Elements maintains solution production facilities in the United States, Northern Europe (Liverpool, UK), Southern Europe (Milan, Italy), Australia and China to allow for lower freight costs and quicker delivery to our customers. American Elements metal and rare earth compound solutions have numerous applications, but are commonly used in petrochemical cracking and automotive catalysts, water treatment, plating, textiles, research, and in optic, laser, crystal and glass applications. We also produce Samarium Acetate Powder. American Elements produces to many standard grades when applicable, including Mil Spec (military grade); ACS, Reagent and Technical Grade; Food, Agricultural and Pharmaceutical Grade; Optical Grade, USP and EP/BP (European Pharmacopoeia/British Pharmacopoeia) and follows applicable ASTM testing standards. Typical and custom packaging is available. Additional technical, research and safety (MSDS) information is available as is a Reference Calculator for converting relevant

units of measurement.
