## Abstracts

As environmental concerns and regulations become more stringent, manufacturers are focusing on creating fluids that are safer for both the user and the environment. Cleaner fluids for saws are designed to reduce or eliminate harmful chemicals and toxins that are commonly found in traditional cutting fluids. These fluids are often biodegradable, non-toxic, and have a lower impact on air and water quality. One of the main benefits of cleaner fluids is improved worker safety. Traditional cutting fluids can contain hazardous substances that can cause skin irritation, respiratory issues, and other health problems. By using cleaner fluids, workers are exposed to fewer harmful chemicals, reducing the risk of health issues. In addition to worker safety, cleaner fluids also have a positive impact on the environment. Traditional cutting fluids can contaminate water sources and contribute to air pollution. Cleaner fluids are designed to minimize these negative effects, making them a more sustainable choice.
