Abstracts

Scalp Micropigmentation (SMP) Services are non - surgical cosmetic procedures designed to create the illusion of a fuller head of hair. Specialized technicians use micropigmentation techniques, similar to tattooing, but on a much finer scale. They carefully deposit tiny dots of pigment into the upper layer of the scalp skin. For those experiencing hair loss, whether due to male or female pattern baldness, alopecia, or other causes, SMP can mimic the appearance of hair follicles. This gives the impression of a closely - cropped haircut, effectively enhancing the scalp's appearance and boosting the client's self - confidence.
