## Abstracts

The 2025 U.S. tariff policies introduce profound uncertainty into the global economic landscape. This report critically examines the implications of recent tariff adjustments and international strategic countermeasures on Screen Printing Tape competitive dynamics, regional economic interdependencies, and supply chain reconfigurations. Screen Printing Tape is a specialized adhesive tape used during the screen printing process to block out unwanted areas, seal screen edges, and prevent ink from leaking onto non-printing surfaces. It is designed to adhere securely to mesh and frame materials while being easy to remove without leaving residue or damaging the screen. Typically resistant to inks, solvents, and cleaning chemicals, screen printing tape helps maintain clean print edges and efficient workflow, making it an essential tool for preparing and maintaining printing screens. The unit price of screen printing tape typically ranges from \$60 to \$120, with industry profit margins between approximately 20% and 30%. The supply chain for screen printing tape involves a structured flow from raw material production to end-user application. Upstream, it includes suppliers of base films such as polyethylene, polyester, or paper, along with adhesive resins, release liners, and coating chemicals that provide the tape's bonding and solvent-resistant properties. Manufacturers then process these materials through coating, slitting, and packaging operations to produce finished rolls. Downstream, the products are distributed through wholesalers, printing equipment suppliers, and online retailers to screen printing workshops, textile manufacturers, and industrial graphics producers. Ultimately, the downstream segment focuses on application, maintenance, and replacement within printing operations, where the tape supports screen sealing, masking, and equipment protection in textile, signage, and industrial printing sectors.

The global Screen Printing Tape market size was estimated at USD 422.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 5.90%

during the forecast period.
