Report Overview

A scuba diving harness is a piece of equipment specially designed for divers, mainly used to secure air tanks and related equipment during scuba diving. Scuba diving harnesses usually consist of shoulder, waist and crotch strap components, which can flexibly adjust the fixed position of the air tank and equipment so that the diver can move and operate more freely in the water. At the same time, the strap can also improve the stability and comfort of the air tank and equipment, reduce shaking and friction during diving, and help divers perform diving operations more safely and comfortably.
