## Abstracts

The 2025 U.S. tariff policies introduce profound uncertainty into the global economic landscape. This report critically examines the implications of recent tariff adjustments and international strategic countermeasures on Scutellariae Extract competitive dynamics, regional economic interdependencies, and supply chain reconfigurations. Scutellariae extract is extracted from *Scutellaria baicalensis*, with its main functional components being baicalin or baicalein. *Scutellaria baicalensis* extract has the effect of inhibiting skin aging caused by environmental stressors such as photoaging, cigarette smoke, and PM2.5. The main product grade of *Scutellaria baicalensis* extract is primarily determined by its baicalin content (based on dry weight). The upstream industry includes *Scutellaria baicalensis* cultivation and supply of authentic medicinal materials, as well as companies supplying extraction solvents such as ethanol and water, excipients, and packaging materials; the downstream industry includes manufacturers of traditional Chinese medicine and prescription granules, health food and dietary supplement brands, skincare and daily chemical companies, and application fields such as animal health and pet nutrition. In 2024, the global market price for *Scutellaria baicalensis* extract was US\$73/kg, with sales of approximately 992 tons, a global production capacity of 1000-1100 tons, and the industry profit margin is 20-25%. The industry trend for Scutellariae extract is witnessing growth and increasing interest. As the demand for natural and plant-based remedies continues to rise, Scutellariae extract is gaining prominence in the nutraceutical, pharmaceutical, and cosmetic industries. The extract's rich bioactive composition and potential health benefits have attracted attention from researchers and product developers. There is a growing focus on incorporating Scutellariae extract into dietary supplements, herbal remedies, and complementary medicine. Additionally, the extract's anti-inflammatory and antioxidant properties make it desirable for skincare products targeting skin conditions like acne and inflammation. With ongoing scientific studies and consumer

demand for natural alternatives, the industry trend for Scutellariae extract is expected to continue positively, driving its utilization and market presence.

The global Scutellariae Extract market size was estimated at USD 72.42 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 11.20% during the forecast period.
