Report Overview

Seafood extract refers to concentrated products derived from marine sources such as fish, shellfish, crustaceans, and algae, processed to retain essential nutrients, proteins, amino acids, and bioactive compounds. These extracts are widely used in food and beverage industries as flavor enhancers, nutritional supplements, and functional ingredients, as well as in pharmaceuticals and cosmetics due to their high collagen, omega-3 fatty acids, and antioxidant properties. The market is driven by increasing consumer demand for natural and nutrient-rich ingredients, alongside growing awareness of seafood-based health benefits.
