Report Overview:

Seasonal allergies are sometimes called "hay fever" or seasonal allergic rhinitis. These allergy symptoms happen during certain times of the year, usually when trees, grasses, and weeds release tiny pollen particles into the air to fertilize other plants. One of the most effective ways to treat seasonal allergies linked to pollen is immunotherapy (allergy shots). These injections expose you over time to gradual increments of your allergen, so you learn to tolerate it rather than reacting with sneezing, a stuffy nose or itchy, watery eyes.
