Abstracts

A security token offering (STO) is a fundraising mechanism in which individuals receive security tokens representing a share or interest in a company or asset. Unlike initial coin offerings (ICOs), STOs are backed by tangible assets, profits, or revenue of a company. This makes them subject to security regulations and offers a more secure and transparent approach to raising capital in the digital space. STOs bridge the gap between traditional finance and the blockchain world. Security token development represents an evolutionary step in financial fundraising, leveraging blockchain technology. Industries worldwide are now integrating STOs as they offer more regulatory clarity than ICOs, guaranteeing asset-backed security. Whether in real estate, art, or startups, STOs promise enhanced liquidity, fractional ownership, and more efficient asset transfer.

The global Security Token Offerings (STO) Development Services market size was estimated at USD 418.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 18.70% during the forecast period.
