Abstracts

A self-absorbent ice pack is a type of ice pack that absorbs water to become cold and can be reused. It is typically made of a superabsorbent polymer (SAP) material, which is a type of polymer that has the ability to absorb and retain large amounts of water. To use a self-absorbent ice pack, simply immerse it in water for a few minutes. The superabsorbent polymer material will absorb the water and become cold. The ice pack can then be used to apply cold therapy to injuries or to keep food and drinks cold. The growth of the market is attributed to the increasing demand for self-absorbent ice packs from various industries, such as sports and fitness, healthcare, and food and beverage. Self-absorbent ice packs are made of a superabsorbent polymer (SAP) material, which is a type of polymer that has the ability to absorb and retain large amounts of water. This makes them ideal for use as cold therapy devices, as they can stay cold for longer periods of time than traditional ice packs. Self-absorbent ice packs have a number of advantages over traditional ice packs, including: Reusability: Self-absorbent ice packs can be used over and over again, simply by immersing them in water. This eliminates the need to purchase disposable ice packs. Convenience: Self-absorbent ice packs are lightweight and easy to carry around. They are also less bulky than traditional ice packs, which makes them ideal for use on the go. Effectiveness: Self-absorbent ice packs can stay cold for longer periods of time than traditional ice packs. This makes them ideal for use for extended periods of time, such as during sporting events or on long trips. Self-absorbent ice packs are safe for use on people of all ages. They are also non-toxic and biodegradable. The increasing demand for self-absorbent ice packs from the sports and fitness industry is one of the key drivers of the market growth. Athletes and fitness enthusiasts use self-absorbent ice packs to relieve muscle pain and inflammation, and to promote recovery after workouts. The healthcare industry is another major consumer of self-absorbent ice packs. Self-absorbent ice packs are used in hospitals, clinics, and other healthcare settings to treat a variety of conditions,

such as sprains, strains, bruises, and arthritis.

The global Self-absorbent Ice Pack market size was estimated at USD 245.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 4.70% during the forecast period.
