Report Overview

Self-adhesive bitumen membrane, also known as a self-adhering waterproofing membrane, is a type of roofing or waterproofing material used to provide a protective barrier against water infiltration. It is typically composed of a flexible bitumen compound that is bonded to a release liner. The membrane is designed to adhere directly to the surface, eliminating the need for additional adhesives or heat application. The self-adhesive nature of the membrane allows for easy and efficient installation, even on complex or irregular surfaces. This type of membrane is commonly used in waterproofing applications for roofs, basements, foundations, and other below-grade structures.
