Abstracts

Self-adhesive LCD dimming film is a self-adhesive liquid crystal film that can be directly attached to surfaces that require dimming, such as glass windows, glass partitions, display screens, etc. This film uses liquid crystal technology to adjust its transparency by changing the electric field, allowing it to achieve adjustable transparent and opaque states under different lighting conditions. The self-adhesive design makes it easy to install and requires no additional glue or adhesive. This property allows it to be easily applied to a variety of surfaces without damaging the base material. Generally speaking, self-adhesive liquid crystal dimming film, as an intelligent light control technology, has huge application potential in construction, automobiles, electronics and other fields. Future development trends will continue to expand around technological innovation, multi-scenario applications and intelligent integration.
