Report Overview

A self-contained breathing apparatus, or SCBA, sometimes referred to as a compressed air breathing apparatus (CABA), or simply breathing apparatus (BA), is a device worn by rescue workers, firefighters, and others to provide breathable air in an immediately dangerous to life or health atmosphere (IDLH). When not used underwater, they are sometimes called industrial breathing sets. The term self-contained means that the breathing set is not dependent on a remote supply (e.g., through a long hose). If designed for use under water, it is called SCUBA (self-contained underwater breathing apparatus).

Self Contained Breathing Apparatus (SCBA) is widely used in fire fighting, industrial and other field. The most proportion of Self Contained Breathing Apparatus (SCBA) is used for fire fighting, and the consumption proportion in 2016 is about 58%.
