At the same time, combined with smart technology, some products will integrate functions such as temperature display, APP control, and timed heating to enhance user experience. In addition, the appearance design will also be more fashionable and portable to meet the aesthetic and usage needs of different groups of people. In terms of application scenarios, in addition to personal daily use, it will also be further expanded to areas such as takeaway delivery, emergency supplies, and airline meals, becoming an important part of modern catering and life services.
