Abstracts

Self-sealing envelopes are a type of mailing or packaging product that eliminates the need for moisture (via licking) or external adhesives (such as glue or tape) to seal the envelope, instead utilizing a pre-applied, pressure-activated adhesive strip protected by a removable liner, which, when exposed and pressed firmly, creates a secure and tamper-evident closure through cohesive or adhesive bonding mechanisms. These envelopes are designed for convenience, efficiency, and improved user experience in both personal and professional settings, commonly used for mailing documents, invoices, promotional materials, or any items requiring discreet and hassle-free sealing, and are available in various sizes, materials (such as paper or plastic), and security features, including patterns or tints to deter unauthorized viewing.
