Report Overview

Self-wound aluminum foil tape is an adhesive tape that features a backing made of aluminum foil without a separate liner. This unique design eliminates the need to peel off a liner during application. The tape is composed of a thin layer of aluminum foil, which offers excellent heat resistance, electrical conductivity, and corrosion resistance. It is coated on one side with a pressure-sensitive adhesive that provides a strong and long-lasting bond. Self-wound aluminum foil tape is commonly used in construction, HVAC, and aerospace industries for sealing, insulating, and joining purposes, thanks to its ability to conform to irregular surfaces and withstand temperature variations.
