### Report Overview

Semi-automatic banding machines, also known as semi-automatic strapping machines or banding systems, are industrial-grade devices designed to partially automate the strapping or banding process. Unlike fully automatic banding machines that perform all strapping operations automatically, semi-automatic machines require some manual intervention, such as placing the strap around the items to be bundled. These machines are commonly used in various industries for bundling, strapping, or banding items together using materials like plastic, polyester, or steel straps.

The global Semi Automatic Banding Machines market size was estimated at USD 48.25 million in 2024 and is projected to grow at a compound annual growth rate (CAGR) of 4.85% during the forecast period.
