Abstracts

Semi-autonomous vehicles, also referred to as Level 2 and Level 3 automation under the SAE International classification system, are automobiles equipped with advanced driver-assistance systems (ADAS) that can control steering, acceleration, and braking under specific conditions while still requiring the human driver to remain engaged and monitor the environment at all times. These systems combine technologies such as adaptive cruise control, lane-keeping assist, traffic jam assist, and automatic emergency braking to reduce driver workload and enhance safety, yet they do not eliminate the need for human oversight, distinguishing them from fully autonomous vehicles.

The global Semi Autonomous Vehicles market size was estimated at USD 12345.67 million in 2024 and is projected to grow at a compound annual growth rate (CAGR) of 12.50% during the forecast period.
