Abstracts

The septic tank decomposition complex enzyme is neutral in nature and is a product that effectively removes odorous gases such as hydrogen sulfide, methane, methyl mercaptan, ammonia and other volatile organic compounds (VOCs) in sewage. Septic tank decomposition compound enzyme (also known as septic tank cleaning enzyme or biological enzyme) is a product that promotes the degradation of organic matter in septic tanks by adding specific enzyme preparations. Its main function is to reduce odor and improve the treatment efficiency of septic tanks by decomposing organic waste (such as feces, grease, sewage, etc.) in septic tanks, avoiding frequent manual cleaning and fecal pumping. Septic tank decomposition compound enzyme is in line with the current trend of environmental protection and green technology. With the increasingly stringent environmental protection regulations and the society's attention to sustainable development, the application of biological enzymes in septic tank cleaning has received more and more attention. This type of enzyme preparation is non-toxic, harmless, and pollution-free, and is a more environmentally friendly treatment method. Since septic tanks are one of the basic infrastructures for urban and rural domestic sewage treatment, especially in rural areas and some old communities, septic tank cleaning is a common demand. Traditional manual cleaning methods often require frequent fecal pumping, which is not only time-consuming and labor-intensive, but also prone to odor pollution. With the promotion of septic tank decomposition compound enzymes, market demand is showing an upward trend. In recent years, with the continuous progress of biotechnology and enzyme engineering, the product types and formulas of septic tank decomposition complex enzymes have gradually diversified, and manufacturers can customize solutions for different environments and treatment requirements. New complex enzyme products often have stronger degradation capabilities, longer shelf life, and stronger adaptability to the environment.

The global Septic Tank Decomposition Complex market size was estimated at USD 496.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 5.50% during the forecast period.
